

TOPICAL MSC EXOSOME  
GROWTH FACTOR  
SKINCARE SERUM

# Vive

With Hyaluronic Acid, Vitamin C,  
Amino Acids, Rose Water, plus Trehalose\*

## 2 TRILLION MICROVESICLES CONTAINING BIOLOGICALLY ACTIVE EXOSOMES

Vive is a topical solution specially developed for skin care purposes. The product contains proteins, enzymes, growth factors, and exosomes derived from mesenchymal stem cells (MSCs).

24 hours post microneedling and fibroblast pen.

### THERE IS NO EQUAL

Vive is unique. Based on its unmatched RNA content, the potency of our formula creates outcomes unseen by other products. When combined with complementary treatments, the results are superior. Enhance the beauty of your skin with the power of Vive. The MSC cell bank utilized in our manufacturing process is meticulously isolated from a single donated pre-COVID human placenta, following strict regulatory guidelines,

*\*Trehalose is known to promote the natural recycling of cellular components. It also helps maintain the biological integrity of the product when frozen.*

Available in 5mL
